BULLETIN PANEL SAVERS

PREVENT ROTTING OR RUSTING FROM WATER ACCUMULATION ON THE BOTTOM OF BULLETIN FACES

After receiving requests from several outdoor operators to solve a rotting & rusting issue that was plaguing the bottom of their wood and metal bulletin faces due to water accumulation in the bottom pocket of the wrapped FlexFace Vinyl, Formetco committed to finding a solution that was both economical and durable. So in collaboration with our customers we developed the Bulletin PanelSavers and are excited to offer this product to the outdoor advertising industry.

Features & Benefits

- Made of strong 20 gauge G-90 galvanized sheet metal for durability
- Extends the life of existing panels
- Creates a smooth edge for wrapping FlexFace Vinyl's
- Stocked in 12' lengths, custom sizes available upon request
- Available for use on wood panels and all types of metal panels
- Available with or without round head stainless steel screws, which eliminates vinyl wear and tear

Bulletin PanelSavers creates a suitable surface for attaching Formetco Vinyl Tensioning Clips, highly recommended for increased panel life
